

3 The Way Forward

3.1 General

The study team has taken into consideration the comments received during PE3 and finalized the RODP, which also forms the basis to drawing up the Recommended Outline Zoning Plan (ROZP), Master Urban Design Plan (MUDP), Master Landscape Plan (MLP) and Layout Plan (LP) for the Tung Chung New Town Extension. Detailed technical assessments (e.g. transport and traffic, geotechnical, marine, hydraulic, drainage, sewage, water, utilities, land, etc.) and statutory EIA under the EIAO have also be carried out to ascertain the feasibility of the finalized RODP, prior to commencement of the design and construction works under separate consultancy.
